Volume 91 (1994)

Special Issue: Health Surveillance of Pesticide Workers

PREFACE xv

CONTRIBUTING PARTNERS xvii

ACKNOWLEDGMENTS xix

Chapter 1
INTRODUCTION: GENERAL STRUCTURE OF THE MANUAL 1
A. Fait
1.1 Lay-out of chapters 1
1.2 List of active ingredients 2
1.3 WHO hazard classification 2
1.4 Key references 3

Chapter 2
BASIC CONCEPTS IN THE OCCUPATIONAL HEALTH MANAGEMENT OF PESTICIDE WORKERS 5
W. Tordoir and M. Maroni
2.1 The management of health risks at the workplace 5
2.2 Hazard identification 6
2.3 Exposure assessment 7
2.4 Risk characterization 9
2.5 Health surveillance 9
2.6 Record keeping 12
2.7 Control measures 13
2.8 Information, instruction and training 13
2.9 First aid and medical treatment 13
2.10 Key references 14

Chapter 3
ORGANOPHOSPHOROUS COMPOUNDS 15
J. Jeyaratnam and M. Maroni
3.0 Name of group 15
3.1 Mode of action — toxic effects 15
3.2 Signs and symptoms of poisoning in man 16
3.3 Medical surveillance 19
3.4 Biological monitoring 20
3.4.1 Indicators of effect 20
3.4.2 Indicators of internal dose 21
3.5 Intervention 22
3.6 First aid advice for lay persons 23
3.7 Advice on treatment 24
3.8 Key references 25
3.9 List of main representative organophosphorous pesticides 25

Chapter 4
CARBAMATE INSECTICIDES 29
L. H. Machemer and M. Pickel
4.0 Name of group 29
4.1 Mode of action — toxic effects 29
4.2 Signs and symptoms of poisoning in man 30
4.3 Medical surveillance 31
4.4 Biological monitoring 31
4.5 Intervention 32
4.6 First aid advice for lay persons 33
4.7 Advice on treatment 34
4.8 Key references 35
4.9 List of main representative carbamate insecticides 35

Chapter 5
DITHIOCARBAMATES 37
J. Liesivuori and K. Savolainen
5.0 Name of group 37
5.1 Mode of action — toxic effects 37
5.2 Signs and symptoms of poisoning in man 38
5.3 Medical surveillance 39
5.4 Biological monitoring 40
5.5 Intervention 40
5.6 First aid advice for lay persons 41
5.7 Advice on treatment 41
5.8 Key references 41
5.9 List of main representative dithiocarbamates 41

Chapter 6
SYNTHETIC PYRETHROIDS 43
F. He
6.0 Name of group 43
6.1 Mode of action — toxic effects 43
6.2 Signs and symptoms of poisoning in man 44
6.3 Medical surveillance 45
6.4 Biological monitoring 46
6.5 Intervention 47
6.6 First aid advice for lay persons 47
6.7 Advice on treatment 47
6.8 Key references 48
6.9 List of main representative synthetic pyrethroids 48

Chapter 7
ORGANOCHLORINES 51
W.F. Tordoir and N.J. Van Sittert
7.0 Name of group 51
7.1 Mode of action — toxic effects 51
7.2 Signs and symptoms of poisoning in man 52
7.3 Medical surveillance 53
7.4 Biological monitoring 54
7.5 Intervention 55
7.6 First aid advice for lay persons 55
7.7 Advice on treatment 56
7.8 Key references 56
7.9 List of main representative organochlorines 57

Chapter 8
TRIAZINES 59
R. Loosli
8.0 Name of group 59
8.1 Mode of action — toxic effects 59
8.2 Signs and symptoms of poisoning in man 59
8.3 Medical surveillance 60
8.4 Biological monitoring 60
8.5 Intervention 61
8.6 First aid advice for lay persons 61
8.7 Advice on treatment 61
8.8 Key references 61
8.9 List of main representative triazines 62

Chapter 9
SUBSTITUTED UREAS 63
A. Ferioli and F. Barbieri

9.0 Name of group 63
9.1 Mode of action-toxic effects 63
9.1.1 Urea herbicides 63
9.1.2 Urea rodenticides 64
9.1.3 Urea insecticides, acaricides and fungicides 65
9.2 Signs and symptoms of poisoning in man 65
9.3 Medical surveillance 66
9.4 Biological monitoring 67
9.5 Intervention 67
9.6 First aid advice for lay persons 67
9.7 Advice on treatment 68
9.8 Key references 68
9.9 List of names representative substituted ureas 68

Chapter 10
COUMARIN DERIVATIVES (RODENTICIDES) 71
N.J. Van Sittert and C.P. Tuinman
10.0 Name of group 71
10.1 Mode of action — toxic effects 71
10.2 Signs and symptoms of poisoning in man 72
10.3 Medical surveillance 72
10.4 Biological monitoring 73
10.5 Intervention 74
10.6 First aid advice for lay persons 74
10.7 Advice on treatment 75
10.8 Key references 76
10.9 List of main representative coumarin derivatives 76

Chapter 11
ORGANOTIN COMPOUNDS 77
A. Fait, A. Ferioli and F. Barbieri
11.0 Name of group 77
11.1 Mode of action — toxic effects 77
11.2 Signs and symptoms of poisoning in man 78
11.3 Medical surveillance 79
11.4 Biological monitoring 80
11.5 Intervention 80
11.6 First aid advice for lay persons 80
11.7 Advice on treatment 81
11.8 Key references 81
11.9 List of main representative organotin compounds 81

Chapter 12
MORPHOLINE DERIVATIVES 83
F. Barbieri and A. Ferioli

12.0 Name of group 83
12.1 Mode of action — toxic effects 83
12.2 Signs and symptoms of poisoning in man 84
12.3 Medical surveillance 84
12.4 Biological monitoring 84
12.5 Intervention 84
12.6 First aid advice for lay persons 85
12.7 Advice on treatment 85
12.8 Key references 85
12.9 List of main representative morpholine derivatives 85

Chapter 13
PHENOXYACETATES 87
B. Kolmodin-Hedman
13.0 Name of group 87
13.1 Mode of action — toxic effects 87
13.2 Signs and symptoms of poisoning in man 88
13.3 Medical surveillance 88
13.4 Biological monitoring 89
13.5 Intervention 89
13.6 First aid advice for lay persons 90
13.7 Advice on treatment 90
13.8 Key references 90
13.9 List of main representative phenoxyacetates 90

Chapter 14
QUATERNARY AMMONIUM COMPOUNDS 93
N.N. Sabapathy
14.0 Name of group 93
14.1 Mode of action — toxic effects 93
14.2 Signs and symptoms of poisoning in man 94
14.3 Medical surveillance 95
14.4 Biological monitoring 95
14.5 Intervention 96
14.6 First aid advice for lay persons 96
14.7 Advice on treatment 97
14.8 Key references 98
14.9 List of main representative quaternary ammonium compounds 98

Chapter 15
FORMAMIDINES 99
S.Z. Xue and R. Loosli
15.0 Name of group 99
15.1 Mode of action — toxic effects 99
15.2 Signs and symptoms of poisoning in man 100

15.3 Medical surveillance 100
15.4 Biological monitoring 101
15.5 Intervention 102
15.6 First aid advice for lay persons 102
15.7 Advice on treatment 102
15.8 Key references 103
15.9 List of main representative formamidines 103

Chapter 16
CARBAMATE HERBICIDES AND FUNGICIDES 105
L.H. Machemer and M. Pickel
16.0 Name of group 105
16.1 Mode of action — toxic effects 105
16.2 Signs and symptoms of poisoning in man 106
16.3 Medical surveillance 107
16.4 Biological monitoring 107
16.5 Intervention 107
16.6 First aid advice for lay persons 108
16.7 Advice on treatment 108
16.8 Key references 108
16.9 List of main representative carbamate herbicides and fungicides 109

INDEX OF ACTIVE INGREDIENTS 111

1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) affects the actin cytoskeleton and calcium level of Swiss 3T3 mouse fibroblasts **(While ATP levels remain unchanged calcium levels rise immediately and actin fibers are disassembled relatively slowly)**
C. Urani, E. Brambilla, A. Santagostino, M. Camatini (Milan, Italy)..... 117–126
Leukemia induced in rats but not mice by dimethyl morpholinophosphoramidate, a simulant anticholinesterase agent **(The organophosphate compound did not shorten the latent period, but increased leukemia incidence)**
P. Chan, R. Cardy, J. Haseman, J. Moe, J. Huff (Research Triangle Park, NC; Rockville, MD).. 127–137
Endosulfan induces small but significant changes in the levels of noradrenaline, dopamine and serotonin in the developing rat brain and deficits in the operant learning performance **(The insecticide induces changes in biogenic amines in olfactory bulb, hippocampus and brain stem)**
M.K. Lakshmana, T.R. Raju (Bangalore, India)..... 139–150
Absolute bioavailability of lead acetate and mining waste lead in rats **(Bioavailability of mining waste lead in soil was approximately 3%)**
G.B. Freeman, J.D. Johnson, S.C. Liao, P.I. Feder, A.O. Davis, M.V. Ruby, R.A. Schoof, R.L. Chaney, P.D. Bergstrom (Columbus, OH; Boulder, Denver, CO; Bellevue, WN; Beltsville, MD) 151–163

Immunotoxicology
Chemotactic activity of human polymorphonuclear leukocytes and industrial xenobiotics: a brief review **(A review on the effects of industrial chemicals on human neutrophil chemotaxis is presented)**
M. Governa, M. Valentino, I. Visonà (Torrette di Ancona, Italy)..... 165–177
Influenza virus host resistance models in mice and rats: utilization for immune function assessment and immunotoxicology **(Three different influenza virus resistance models are described from the viewpoint of immunotoxicology)**
H. Lebrec, G.R. Burleson (Research Triangle Park, NC)..... 179–188

Immunotoxic organotins as possible model compounds in studying apoptosis and thymocyte differentiation **(The mechanism of organotins immunotoxicity is discussed based on recent findings)**
R.H.H. Pieters, M. Bol, A.H. Penninks (Utrecht, Zeist, The Netherlands) 189–202

Changed distribution and immune effects of nickel augment viral-induced inflammatory heart lesions in mice **(Oral administration of 0.002 M nickel chloride for 10 weeks to Balb/c mice prior to inoculation with the myocarditic cosackievirus B3 was associated with increased inflammatory and necrosis lesions of the heart)**
N.-G. Ilbäck, J. Fohlman, G. Friman (Helsingborg, Uppsala, Sweden) 203–219

Publisher's Announcement ..... iii–iv

Methylene chloride: an inhalation study to investigate toxicity in the mouse lung using morphological, biochemical and Clara cell culture techniques **(Methylene chloride causes vacuolization of Clara cells which seems to be mediated by cytochrome P-450)**
J.R. Foster, T. Green, L.L. Smith, S. Tittensor, I. Wyatt (Maccclesfield, Leicester, UK) 221–234

Skeletal changes in multiparous and nulliparous mice fed a nutrient-deficient diet containing cadmium **(Cadmium induced calcium losses reduced femur calcium content in nulliparous and multiparous mice fed a nutrient-deficient diet)**
B.D. Whelton, M.H. Bhattacharyya, D.P. Peterson, E.S. Moretti, J.M. Toomey, L.L. Williams (Cheney, WA; Argonne, IL; Ithaca, NY; East Lansing, MI) 235–251

Role of hydrocortisone in dimethylnitrosamine-induced suppression of antibody response in the mixed culture of murine hepatocytes and splenocytes **(DMN-induced immunosuppression in hepatocyte/splenocyte cultures is affected through a pathway which does not appear to be related to the glucocorticoid receptor)**
T.C. Jeong, K.-H. Yang, S.D. Jordan, W.D. Stevens, M.P. Holsapple (Richmond, VA; Taejon, Korea) 253–268

Percutaneous absorption, dermatopharmacokinetics and related bio-transformation studies of carbaryl, lindane, malathion, and parathion in isolated perfused porcine skin **(Carbaryl had the highest absorption)**
S.K. Chang, P.L. Williams, W.C. Dauterman, J.E. Riviere (Raleigh, NC) 269–280

Immunotoxicology

Asessment of the Brown Norway rat as a suitable model for the investigation of food allergy **(A model for the investigation of allergic reactions to milk proteins in the Brown Norway rat is presented)**
H.A.C. Atkinson, K. Miller (Carshalton, UK) 281–288

Review article

Immunotoxicity of the colour additive Caramel Colour III; A review on complicated issues in the safety evaluation of a food additive **(Animal and human data on the immunotoxicity assessment of the food additive Caramel Colour III are reviewed)**
G.F. Houben, A.H. Penninks (Zeist, Utrecht, The Netherlands) 289–302

Contents of Journals Relating to Toxicology 303–312
